To the FCC:

We are strongly opposed to the proposal for disconnection of my existing Comcast digital phone service: §63.71 of Comcast Phone of Minnesota, LLC and the required switch to their voice over IP system, digital voice.

We are a current subscribers to Comcast's high-speed internet services. Though we are satisfied with the speed and value added services of Comcast Broadband, the service periodically freezes completely, until the (broadband modem and networking) system has a hard reboot.

Our concern is maintaining the ability to contact emergency services via phone, if the internet connection is severed (as it often is).

We realize there are other service providers available for phone service. However, should we move phone service to another provider, by no longer 'bundling' phone and broadband services, Comcast will increase the rate on our Broadband by nearly \$240 annually.

Additionally, the change in hardware (using Comcast digital voice) will require a significant rewiring of our home and home office voice and data systems.

Please take this into advisement and deny Comcast's application to discontinue digital phone service.
